

- ✓ True One Step, Universal Disinfection
- ✓ Biodegradable & Environmentally Friendly
- ✓ Gentle on skin
- ✓ No hormone disrupting chemicals
- ✓ Safer for both hard & soft surfaces incl Leather, Vinyl, Cloth...
- ✓ Safer for Cell Phones, Tablets, Touchscreens
- ✓ Safer on Plastics (than competing disinfectant brands)
- ✓ BioTEXT is on Health Canada's COVID list (that destroys COVID-19)
- ✓ Hospital Grade Disinfection
- ✓ Ideal for: Child Care, Food Processing, Industrial, Medical/Dental/Veterinary

BioTEXT Concentration vs. Contact Times

Contact time is the time a disinfectant takes to effectively Kill/Destroy Bacteria, Virus & Fungi; therefore, the surface must remain wet with the product for the amount of contact time for product to be effective.

BioTEXT Concentration	Diluted with water	Contact Time
100 %	No Dilution	3 Min
50%	1L BioTEXT to 1L of water	15 Min
25%	250ml of BioTEXT to 1L of water	30 Min
10%	100ml of BioTEXT to 1L of water	60 Min

Refer to concentrations and contact times above!

At 100% concentration kill times listed below:

Within 3 mins: Staphylococcus aureus (10% soil), Enterococcus hirae, Escherichia coli (E.coli)(6.2% soil), Pseudomonas aeruginosa (10% soil/bioburden), Candida albicans (Fungus), Mycobacterium bovis BCG (5% soil), Mycobacterium terrae (4.6% soil) Salmonella enterica (choleraesuis) (10% soil/bioburden)

Further breakdown of concentration and contact times available upon request.
